

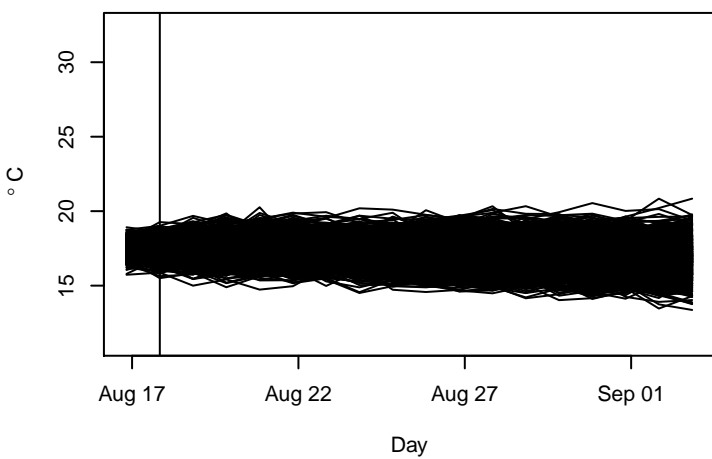

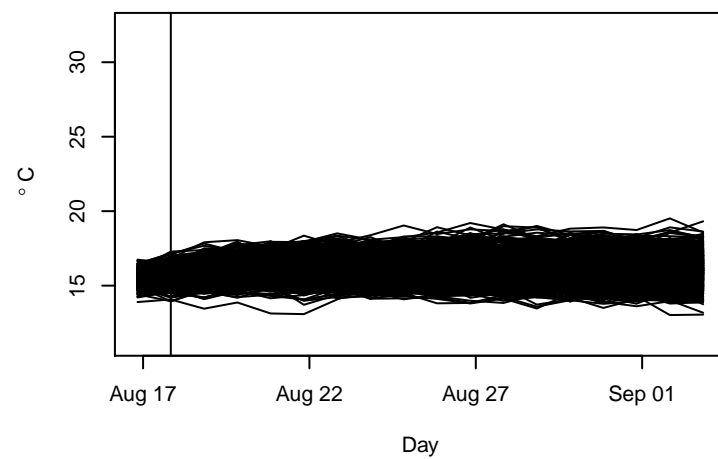

Figure 1 is a line plot showing the daily number of new cases in the United States from August 17 to September 1, 2020. The x-axis is labeled 'Day' and has major ticks for Aug 17, Aug 22, Aug 27, and Sep 01. The y-axis represents the number of new cases, with a vertical line at approximately 100,000. The plot displays multiple lines representing different regions or models, showing a general upward trend in cases over time.
