

Date	Maximum Temperature (°C)	Minimum Temperature (°C)
Oct 03	16.5	15.5
Oct 05	16.5	15.5
Oct 07	16.0	14.5
Oct 10	15.5	14.0
Oct 15	14.8	12.5
Oct 20	13.5	10.5

Figure 1 is a line graph showing the evolution of the daily maximum temperature ( $T_{max}$ ) and the daily minimum temperature ( $T_{min}$ ) at the station of La Alfranca. The x-axis represents the day of the year (from Oct 05 to Oct 20), and the y-axis represents temperature in degrees Celsius ( $^{\circ}\text{C}$ ). The  $T_{max}$  is represented by a solid black line, and the  $T_{min}$  is represented by a dashed black line. Both lines show a general downward trend over the period. A vertical line is drawn at approximately Oct 04, and a horizontal line is drawn at approximately 15.8°C. Four red dots are plotted on the  $T_{max}$  line at approximately Oct 04, Oct 05, Oct 06, and Oct 07.

Figure 1 is a line graph showing the evolution of the daily mean temperature (solid line) and its 95% confidence interval (dashed lines) for the period from October 3 to October 20, 2019. The y-axis represents temperature in degrees Celsius (°C), ranging from 10 to 18. The x-axis represents the day of the month. A vertical line marks the date October 4, 2019. The temperature starts around 12.5°C on Oct 3, peaks at approximately 13.5°C around Oct 10-12, and then gradually declines to about 12.5°C by Oct 20.
