

Figure 1 is a line graph showing the diurnal temperature profile of the water column at station 100 on October 11, 1998. The y-axis represents temperature in degrees Celsius (°C), ranging from 12 to 20. The x-axis represents the day, with labels for Oct 11, Oct 16, Oct 21, and Oct 26. A solid line represents the temperature profile at 0600 hours, and a dashed line represents the profile at 1800 hours. A vertical line is drawn at approximately Oct 12.5. The temperature generally decreases over time, with a notable dip around Oct 21.

Day	Mean Temp (°C)	Lower SD (°C)	Upper SD (°C)
Oct 11	18.2	17.5	18.8
Oct 12	18.5	17.8	19.0
Oct 13	18.0	17.2	18.8
Oct 14	17.5	16.8	18.2
Oct 15	17.0	16.2	17.8
Oct 16	16.8	16.0	17.5
Oct 17	16.2	15.2	17.2
Oct 18	16.0	14.8	17.2
Oct 19	16.0	14.5	17.5
Oct 20	16.0	14.5	17.5
Oct 21	16.1	14.5	17.4
Oct 22	16.2	14.8	17.5
Oct 23	16.2	15.0	17.5
Oct 24	16.0	14.5	17.5
Oct 25	15.8	13.5	17.5
Oct 26	15.5	13.2	17.4
Oct 27	15.2	13.0	17.2
