Figure 1 is a line graph showing the temperature of the water in the incubator over time. The y-axis is labeled "°C" and ranges from 10 to 30. The x-axis is labeled "Day" and shows dates from July 18 to July 28. The temperature starts at approximately 11.5°C on July 18, rises slightly to about 12°C by July 20, and then remains relatively stable, fluctuating between 11.5°C and 12°C until July 28.

Figure 1 is a line graph showing the temperature of the water in the tank over time. The y-axis is labeled "°C" and ranges from 10 to 30. The x-axis is labeled "Day" and shows dates from Jul 18 to Jul 28. The temperature starts at approximately 11.5°C on Jul 18, rises to about 12.5°C by Jul 20, and then remains relatively stable around 11.5°C until Jul 28.
